SUMMARY

Computer Engineering undergraduate with a 9.4 CGPA and extensive hands-on experience in applied machine learning, autonomous agentic systems (NVIDIA NIM, LangGraph), deep learning forensics, and computer vision. Demonstrated software engineering experience across internships at Persistent Systems and Bodhami training custom domain models, deploying RAG memory pipelines, and integrating multimodal foundation models.

EDUCATION

Padre Conceicao College of Engineering, Verna, Goa 2023 – 2027

Bachelor of Engineering in Computer Engineering **Current CGPA (Sem I – Sem VI): 9.4**

Shri Damodar HSSC of Science — HSSC: 70% (2023) | **Mahila and Nutan English High School** — SSC: 91.83% (2021)

TECHNICAL SKILLS

AI, ML & Agentic Systems:	PyTorch, LangGraph, LangChain, Hugging Face Transformers, OpenCV, Scikit-Learn
Foundation Models & APIs:	NVIDIA NIM, Gemini API, Groq API, RAG Pipelines
Languages & Backend Serving:	Python, TypeScript, JavaScript, C++, FastAPI, RESTful APIs, OpenAPI 3.0, Node.js
Databases, Cloud & DevOps:	PostgreSQL, MySQL, MongoDB, Supabase, IndexedDB, Docker
Methodologies & Practices:	Agile Sprints, Git & GitHub Workflows, Model Optimization, Clean Architecture, Cross-Functional Collaboration

EXPERIENCE

Bodhami Private Limited – AI and Full Stack Developer Intern May 2026 – Present | Goa, India

- Architected algorithmic real-time cost estimation routines calculating material and labor expenses, reducing contractor quotation turnaround time by 40% across 3D spatial visualization modules.
- Engineered decoupled full-stack APIs using Python and TypeScript, integrating Gemini API for instantaneous spatial layout analysis and PDF quotation generation in under 2 seconds.

Technologies: Python, TypeScript, Gemini API, Next.js, Node.js, Supabase, 3D Spatial Graphics

Persistent Systems Limited – AI Application Developer Intern August 2026 – October 2026 | Goa, India

- Executed custom AI model training and fine-tuning on domain-specific datasets, achieving 95%+ classification accuracy and deploying speech-to-text pipelines using OpenAI Whisper and Docker microservices.
- Integrated enterprise Single Sign-On (SSO via OAuth 2.0 / OIDC) with sub-120ms authentication latency, adhering to enterprise clean architecture standards.

Technologies: Python, PyTorch, Groq API, OpenAI Whisper, Gemini API, SSO (OAuth 2.0 / OIDC), React.js, Node.js, PostgreSQL, Docker

Creative Capsule – Software Engineering Intern August 2026 – October 2026 | Goa, India

- Spearheaded full-stack offline-first enterprise workflow architectures using Nest.js, TypeScript, PostgreSQL, and Prisma ORM, maintaining 100% data integrity during network drops.
- Constructed modular components and continuous regression testing workflows under senior engineering mentorship, improving application efficiency by 25%.

Technologies: Nest.js, TypeScript, React.js, Node.js, PostgreSQL, Prisma ORM, Docker, Tailwind CSS

Virtual Simulations: Google Cloud (Generative AI & LLMs) | Tata Group (GenAI Data Analytics) | Deloitte (Technology Consulting) via Forage (2025)

PROJECTS

TRAVELLOG – Autonomous Multi-Agent AI Travel Reconstruction January 2026 – March 2026

- Orchestrated an autonomous multi-agent pipeline using NVIDIA NIM APIs, integrating Microsoft Phi-4 multimodal vision, Mistral-NeMo narrative synthesis, and 4,096-dim NV-Embed semantic vector indexing.
- Configured cross-journal semantic memory linking using cosine similarity and Rerank-QA Mistral-4B, accelerating RAG context retrieval by 55% across multimedia travel journals.

Technologies: NVIDIA NIM, Multi-Agent Orchestration, RAG, Node.js, MongoDB, Socket.io, HTML5, CSS3

https://github.com/swayamprabhu2005/TravelLog-Travel_Journal

CADENCE – Personal Growth & Momentum Workspace August 2026 – September 2026

- Developed an agentic planning platform using Google Gemini and Groq API that automatically decomposes multi-month objectives into verifiable daily milestones.
- Trained and deployed an on-device emotion analysis engine using a custom PyTorch 4-head attention BiLSTM, achieving sub-5ms CPU inference latency for contextual reflection.

Technologies: Python, FastAPI, Google Gemini, Groq API, PyTorch, React, Framer Motion

https://github.com/swayamprabhu2005/CADENCE-Personal-Growth-and-Momentum-Workspace

VERITASCAN – Forensic Multimodal Deepfake Detection Platform February 2026 – March 2026

- Deployed a dual-domain neural pipeline combining modified ResNet-18 spatial feature backbones with Fast Fourier Transform (FFT) spectral frequency analysis, achieving 94.2% detection accuracy across multimodal synthetic media.
- Implemented acoustic synthetic voice analysis leveraging Fast Whisper and Librosa spectral decomposition with FastAPI asynchronous frame inference executing in under 800ms.

Technologies: Python, PyTorch, ResNet-18, Hugging Face Transformers, Fast Whisper, Librosa, FastAPI, React

https://github.com/swayamprabhu2005/VERITASCAN

EDULENS AI – Computer Vision Attention & Engagement Telemetry March 2026 – April 2026

- Built a real-time computer vision telemetry engine in Python using OpenCV, tracking classroom focus via facial landmark extraction, eye-gaze vector estimation, and head orientation classification.
- Engineered an asynchronous FastAPI telemetry ingestion pipeline processing 30 FPS video streams, delivering real-time focus heatmaps and engagement time-series metrics.

Technologies: Python, OpenCV, FastAPI, Facial Landmark ML, React, Chart.js, Recharts

CERTIFICATIONS & HONORS

- **Understanding Incubation and Entrepreneurship** – NPTEL, IIT Bombay — 2026 | 4 Credits (Score: 93/100, Elite + Gold)
- **Introduction to Agent Skills** – Anthropic — 2026
- **Claude 101 & Claude Code in Action** – Anthropic — 2026
- **GenAI & AI Agent Developer: RAG & Vector Systems** – Bodhami Learning — 2026
- **Cloud & DevOps Associate: AWS, Docker & CI/CD** – Bodhami Learning — 2026
- **Full Stack Developer – React and Node.js** – Bodhami Learning — 2026
- **Computer Vision & Natural Language Processing** – Infosys Springboard — 2026
- **Data Structures and Algorithms in C** – Udemy — 2024–2025
- **Finalist – IDEAS 4.0**, Padre Conceicao College of Engineering (PCCE) — 2026
