SUMMARY

Computer Engineering undergraduate with a 9.4 CGPA and demonstrated full-stack software engineering experience across internships at Persistent Systems, Creative Capsule, and Bodhami. Specialized in architecting multi-tenant SaaS platforms, offline-first transactional architectures (IndexedDB), enterprise SSO (OAuth 2.0 / OIDC), and high-concurrency microservices.

EDUCATION

Padre Conceicao College of Engineering, Verna, Goa 2023 – 2027

Bachelor of Engineering in Computer Engineering **Current CGPA (Sem I – Sem VI): 9.4**

Shri Damodar HSSC of Science — HSSC: 70% (2023) | **Mahila and Nutan English High School** — SSC: 91.83% (2021)

TECHNICAL SKILLS

Frontend & Web Frameworks:	TypeScript, React.js, Next.js, Node.js, Tailwind CSS, Three.js, Framer Motion
Languages:	JavaScript, Python, C, C++, Java, HTML5, CSS3
Databases & DevOps:	PostgreSQL, Prisma ORM, MongoDB, MySQL, Supabase, IndexedDB, Docker
Architecture & Tools:	FastAPI, SSO (OAuth 2.0 / OIDC), RESTful APIs, OpenAPI 3.0, Gemini API, Groq API, PyTorch, Socket.IO, Git/GitHub
Methodologies & Practices:	Agile Sprints, Cross-Functional Collaboration, System Optimization, Clean Architecture

EXPERIENCE

Bodhami Private Limited – AI and Full Stack Developer Intern May 2026 – Present | Goa, India

- Architected algorithmic real-time cost estimation routines calculating material and labor expenses, reducing contractor quotation turnaround time by 40% across 3D spatial visualization modules.
- Engineered decoupled full-stack APIs using TypeScript and Python, streamlining contractor quotation workflows and instantaneous PDF quotation pipelines in under 2 seconds.

Technologies: TypeScript, Next.js, Node.js, Python, Gemini API, Supabase, 3D Spatial Graphics

Persistent Systems Limited – AI Application Developer Intern August 2026 – October 2026 | Goa, India

- Developed containerized enterprise microservices using Node.js, React.js, and Docker, integrating OAuth 2.0 / OIDC Single Sign-On (SSO) with sub-120ms authentication latency.
- Conducted custom AI model training and fine-tuning on domain datasets, achieving 95%+ classification accuracy and deploying Whisper speech processing pipelines adhering to clean architecture standards.

Technologies: React.js, Node.js, PyTorch, Groq API, Gemini API, Whisper, SSO (OAuth 2.0 / OIDC), PostgreSQL, Docker

Creative Capsule – Software Engineering Intern August 2026 – October 2026 | Goa, India

- Spearheaded full-stack offline-first enterprise workflow architectures using Nest.js, TypeScript, PostgreSQL, and Prisma ORM, ensuring 100% transactional data persistence during network drops.
- Constructed modular UI components and continuous end-to-end regression test suites under senior engineering mentorship, improving frontend render performance by 25%.

Technologies: Nest.js, TypeScript, React.js, Node.js, PostgreSQL, Prisma ORM, Docker, Tailwind CSS

Virtual Simulations: Deloitte (Technology Consulting & Systems Architecture) | Google Cloud (Generative AI & LLMs) | Tata Group (GenAI Data Analytics) via Forage (2025)

PROJECTS

DESKSPHERE – Multi-Tenant Offline-First Desk Booking Platform September 2026

- Architected an enterprise multi-tenant SaaS with subdomain tenant isolation, a 4-tier RBAC hierarchy, and Microsoft Entra ID (OIDC / OAuth 2.0) SSO, supporting 500+ daily booking simulations.
- Implemented an offline-first transactional engine using native IndexedDB outbox queuing and live ExcelJS formulas, cutting bulk roster ingestion processing time by 60% with strict data consistency.

Technologies: React 18, TypeScript, Tailwind CSS, Express.js, Prisma ORM, PostgreSQL 16, Docker, IndexedDB, Excel

https://github.com/swayamprabhu2005/DeskSphere

VERITASCAN – Forensic AI Deepfake Detection Platform February 2026 – March 2026

- Built an end-to-end full-stack forensics application using a FastAPI backend and React frontend, generating comprehensive forensic PDF analysis reports with NLP summaries within 1.8-second response windows.
- Designed interactive 3D confidence heatmaps using Three.js and Framer Motion with Firebase user authentication and high-throughput asynchronous video upload processing.

Technologies: React 19, FastAPI (Python), PyTorch, Hugging Face Transformers, Three.js, Framer Motion, Firebase Auth

https://github.com/swayamprabhu2005/VERITASCAN

TRAVELLOG – Collaborative Travel Journal & Community Platform January 2026 – March 2026

- Engineered a full-stack digital travel journal web application featuring Supabase authentication, MongoDB document storage, and interactive GitHub-style activity heatmaps.
- Integrated live community chat rooms using Socket.IO and event-driven Node.js architecture, delivering sub-50ms message broadcast latency across active client rooms.

Technologies: HTML5, CSS3, JavaScript, Node.js, MongoDB, Socket.IO, Supabase

https://github.com/swayamprabhu2005/TravelLog-Travel_Journal

TUNEVAULT – Digital Music IP & Trademark Registration Portal August 2025 – October 2025

- Delivered a scalable digital trademark and metadata registration portal for artists, songs, and albums with robust relational schemas.
- Configured granular role-based access control (RBAC), multi-entity relational schemas, and secure cloud storage using Node.js, MySQL, and Supabase.

Technologies: HTML5, CSS3, JavaScript, Node.js, MySQL, Supabase

CERTIFICATIONS & HONORS

Understanding Incubation and Entrepreneurship – NPTEL, IIT Bombay 2026 | 4 Credits (Score: 93/100, Elite + Gold)

Introduction to Agent Skills – Anthropic 2026

Claude 101 & Claude Code in Action – Anthropic 2026

Cloud & DevOps Associate: AWS, Docker & CI/CD – Bodhami Learning 2026

GenAI & AI Agent Developer: RAG & Vector Systems – Bodhami Learning 2026

Full Stack Developer – React and Node.js – Bodhami Learning 2026

Computer Vision & Natural Language Processing – Infosys Springboard 2026

Data Structures and Algorithms in C – Udemy 2024–2025

Finalist – IDEAS 4.0, Padre Conceicao College of Engineering (PCCE) 2026
